

CAPABILITIES · LEAVE-BEHIND

Your brand should hit as hard as your builds.

JumaPCTech makes something genuinely good — **hand-built custom gaming PCs**, a real tier lineup, real people behind the support. The gap isn't the product. It's that the brand doesn't show it yet. We put together a concept to show what it looks like when the visuals match what you're actually selling.

AI PRODUCT RENDER · CONCEPT

WHAT WE SAW

Strong builds and a real tier ladder, sold through a **template banner** that doesn't carry the quality. The trust story — warranty, testing, real support — and the \$34.99 / \$39.99 services were hard to find.

WHAT WE BUILT

A cinematic, trust-first direction: a sharper **Rajdhani** mark, a product-theater homepage with a **TYRO / ACE / SUPREME** ladder, and social graphics that look like the rigs you actually ship.

WHAT CSC CAN DO FOR YOU

Website redesign

A homepage that leads with product theater — trust-first layout and a clear tier ladder that turns browsers into buyers.

Logo & brand identity

A sharper, more technical mark in Rajdhani — with a wordmark-only variant for web headers, social overlays, and apparel.

Social graphics

Scroll-stopping TikTok covers, IG sale posts and promo squares that match the cinematic quality of your builds.

Product visuals

Cinematic AI product photography and composition — ready to drop straight into your site and ads.

CINEMATIC

If the concept resonates, let's talk.

We're a family-run studio out of Fargo — web, brand, graphic and media design. Small shop, same as you. No pitch here. The full preview is yours to look at; reply and we'll have a real conversation about what makes sense.
